

bio- & medical informatics research center Antwerp

biomina

Lunch talks

Speakers:

Friday 25th of March [12:00 – 13:30 CGB T.138]

Peter De Rijk

miRNA genetics: impact of variants in miRNA genes on function and disease

Pieter Monsieurs

The role of mobile genetic elements in evolutionary adaptation of bacteria

Monday 25th of April [12:00 – 13:30 CMI G.016]

Wim Vranken

Structural bioinformatics and beyond in Brussels

Ajay Kumar

Computational approaches towards finding causal variant in BAV disease

Friday 27th of May [12:00 – 13:30 CMI G.016]

Jan Fostier

Halvade: Scalable Sequence Analysis with MapReduce

Nicolas De Neuter

The role of HLA alleles underlying CMV susceptibility in allogeneic transplant populations

Friday 24th of June [12:00 – 13:30 CMI G.004]

Jan Aerts

Data visualization in data science

Wout Bittremieux

Git: How version control can power your research
